

# COMMON INCIDENT COMMAND CENTER SITUATIONS

---

## **HOUSEHOLD HAZARDOUS WASTE**

(November 2005)

*Potential Contacts and/or Report Distribution:* (**BOLD = REQUIRED CONTACTS**)

- **Regional Office** (completed automatically on MEERTS II Incident Report)
- E-mail (January 4, 2005 memo on Guidance for EER E-Mail Messages) if an EER Response is made.

*Duty Officer Considerations:*

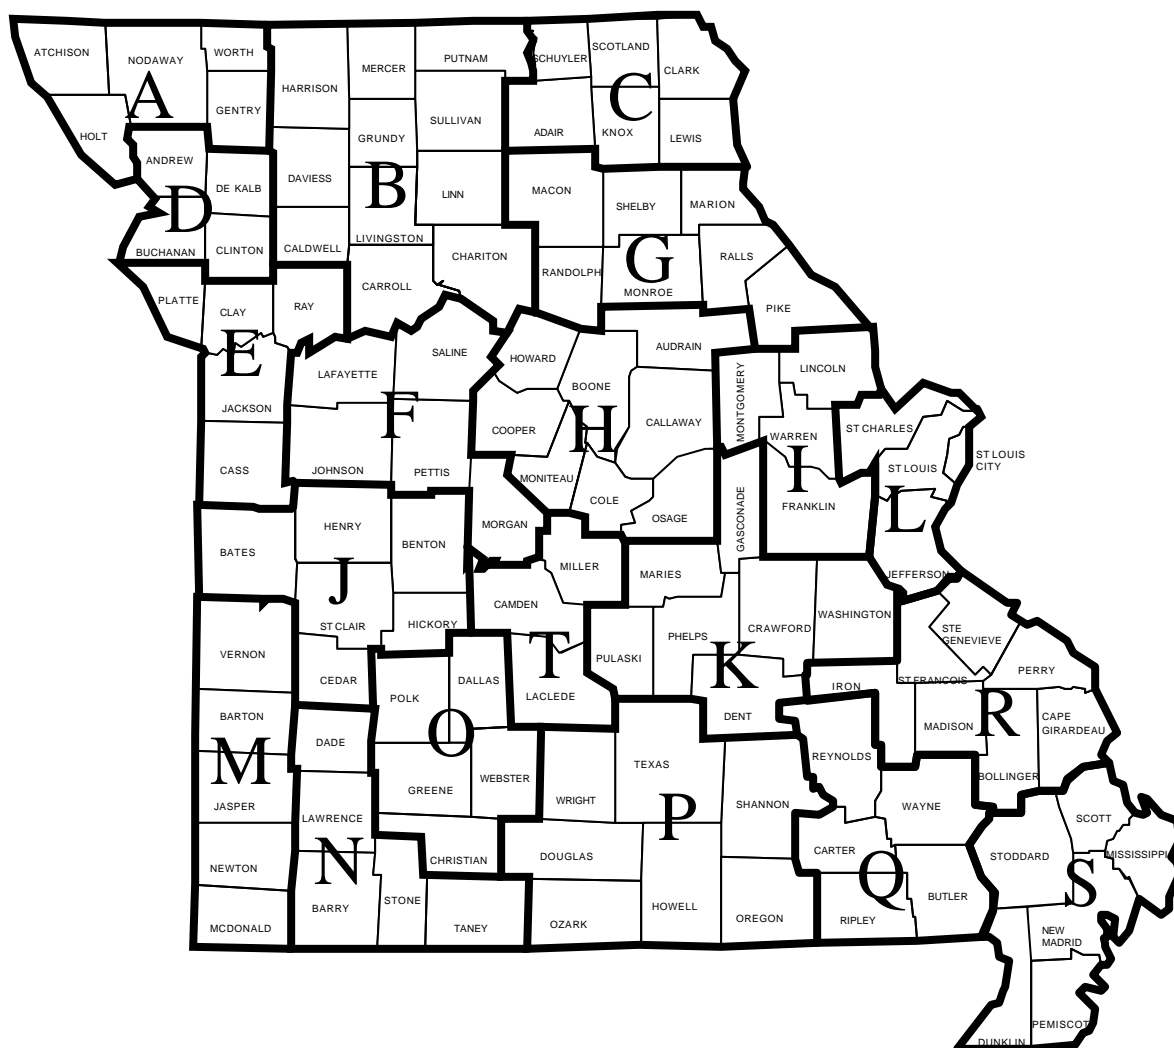

**\*\* Always advise the caller to use caution if they handle the materials\*\***

- Determine the type and amount of HHW the caller has for disposal. Advise the caller on proper storage and handling (e.g., wear gloves when handling, label and store in a bucket away from children and pets). Determine if there is a beneficial use for the material (e.g., a useable paint) and if the caller can use or give away the material.
- Advise the caller to contact a Missouri Permanent Household Hazardous Waste Collection Facility if they have one in their area (see attached list). The caller can make arrangements when the facility is open to deliver their household waste.
- If the caller is not served by a permanent HHW facility, contact the respective Solid Waste Management District (SWMD) Planner (see the attached list and Region Map) to determine if the SWMD is hosting/planning a collection event in the area, **or if not**, determine if the Solid Waste Management District can make arrangements to help the caller dispose of the waste. The list of Solid Waste Management District Planners can also be found on the SWMP's web page at <http://www.dnr.mo.gov/alpd/swmp/swmd/swmdinfo.htm>
- If there are no viable local disposal options available, determine if the caller needs assistance with identifying and disposing of the household waste. Determine if the HHW can safely be disposed of at a sanitary landfill:
  - Is the material a solid that is relatively benign? Send it to a landfill.
  - Is the material a paint waste or other semi-solid that can be safely solidified with either sorbents or evaporation? Solidify and send to a landfill.
- If the material is explosive, flammable, reactive, highly toxic, or a liquid that cannot be safely solidified or evaporated, then consider making arrangements with an OSC to conduct a site visit.

### **Field Information**

- OSC should conduct a site visit to conduct an inventory and determine if the wastes need to be removed for disposal.
- The EER and Kansas City Household Hazardous Waste Center (KCHHWC) have a Memorandum of Agreement for household hazardous waste management wherein the KCHHWC will accept HHW from EER personnel for a minimal fee charged to ESP EER.
- Adequately inventory and package the waste for temporary storage in the ESP Haz-Cat Room. The OSC is responsible for ensuring the materials are properly identified and labeled.
- Attach a copy of the EER Incident Report to the package of waste and ensure Eric Sappington is aware that the material has been placed in the ESP Haz-Cat Room.
- Contact KCHHWC and make arrangements to deliver the materials. A complete inventory list and Incident Numbers must accompany the materials.
